1.The following is an examiner's statement of reasons for allowance: the prior art neither teaches nor suggests, in a method of making a thermoformable tubular liner for a prosthesis, the aspects of (1) preparing a negative cast from a patient's residual limb, (2) preparing a positive cast from the negative cast, (3) placing a thermoformable tubular liner over the positive cast, (4) heating the positive cast and thermoformable tubular liner in an oven so that the tubular liner takes on a new geometry, (5) removing the positive cast and thermoformable liner from the oven and allowing them to cool to room temperature, and (6) removing the thermoformable tubular liner from the positive cast, an interior surface of the tubular liner conforming to the shape of the positive cast, the tubular liner exhibiting elasticity when cooled to room temperature and returning to its new geometry when stretched and released at room temperature, the tubular liner adapted to be stretched and fitted over a residual limb, whereby the tubular liner remains on the residual limb even as the residual limb shrinks over time. The prior art also neither teaches nor suggests the use of the triblock copolymers with mineral oils of claims 11 and 23 or the forming of a liner having a durometer on the 00 scale within the range of claims 12 or 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2.An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

Art Unit: 1732

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. In the specification

Page 1, line 5, "Liner." " has been deleted and – Liner", now abandoned. – has been inserted.

In the claims:

Claim 23 has been canceled and replaced by the following new claim:

- -- 25. A method of making a thermoformable tubular liner for use in a prosthetic appliance, comprising the steps of:
  - preparing a negative cast from a patient's residual limb;
  - preparing a positive cast from said negative cast;
  - formulating a thermoformable tubular liner by mixing triblock copolymers of the styrene, ethylene styrene type with mineral oils at a predetermined concentration;
  - heating said thermoformable tubular liner in an oven for a predetermined amount of time at a predetermined temperature;
  - removing said thermoformable tubular liner from said oven and placing said thermoformable tubular liner over said positive cast and allowing said cast and thermoformable liner to cool to room temperature; and
  - removing said thermoformable tubular liner from said cast, whereby an interior surface of said thermoformable tubular liner conforms to the shape of said positive cast. –
